*I*n 1959 the Menominee Tribe was terminated by federal law and Menominee County was created as the newest county in Wisconsin. In 1974 the tribe gained federal recognition and reclaimed most of its reservation. Presently the county shares coterminous borders with the Menominee Tribe Reservation. The county has the largest single tract of virgin timberland in Wisconsin. Most of the land is protected by a Federal trust for use by enrolled members of the Menominee nation. The majority of residents in the county are members of the Menominee nation and the county currently has around 4,230 people living on its 234,355 acres.

*S*hawano County was originally called Shawanaw until 1864. The original name came from an Ojibwa word meaning “lake to the south”. Samuel Farnsworth was an early settler that saw potential for a lumber industry in the area in 1844. He legally acquired the land and built a sawmill on the edge of Wolf River at the Shawano Lake outlet. After the mill was up the area grew very fast due to the hardwood forest and the rich farm land. Around 1850 the population was about 300 and by 1870 it had rose to around 3,165. Around 1900 the lumber industry started to die off and dairy farming took over. The current population is around 42,000 people.

Cities

Shawano (county seat)

Waupaca County was established in 1851 on the edge of the great pine forest. At this time the county seat was Mukwa but was later moved to Waupaca after a bunch of failed voting attempts and a few court cases. The county grew rapidly bringing settlers in from all around the area with the outstanding logging industry and fertile soils for farming. The first saw mill was constructed in 1848 in Mukwa and farming followed with the first field plowed in 1849. When the logging industry began to slow the area started to become a tourist attraction with its beautiful scenery, 240 lakes and 74 rivers. Today Waupaca is home to around 52,500 residents.

Summer Energy Saving Techniques

Conduct an energy assessment to find out where you can save the most. This will allow you to see where the biggest problem areas are.

Windows

- Close curtains during the day to block sunlight and open them at night.
- Plant trees, shrubs, or vines to help shade your home.
- Apply solar window film to windows.

Adjust Your Thermostat

- When you're home and awake, set your thermostat at the highest comfortable temperature.
- When you're out of the house, turn your thermostat up. You can save 1-3 percent per degree, for each degree the thermostat is set above 72 degrees, depending on the outside temperature.
- You can set a programmable thermostat to keep the temperature where you want day and night.

Maintain Your Cooling Systems

- Schedule service for your cooling system.
- Do regular maintenance to keep your cooling system operating efficiently.

Fans and Vents

- Keep inside air vents clear from furniture and other objects.
- Run energy efficient ceiling and whole-house fans to circulate the air.
- Use the bathroom vent to remove the heat and humidity after showering.

Appliances and Electronics

- Try not to use the oven on hot days. Cook on the stove top, microwave, or grill outside.
- Keep your fridge and freezer full. The refrigerator will run less often.
- Air dry dishes in the dish washer.
- Wash laundry with cold water and air dry.
- Unplug electronics when not in use.

Lighting

- Use light emitting diodes "LED's". They use less energy and have a longer life span, plus they produce less heat than incandescent and CFL bulbs.

Winter Energy Saving Techniques

Windows

- Open curtains during the day to allow sunlight in and close them at night.
- Tape a clear plastic sheet or film to the window frames.
- Install insulating drapes or shades on windows.

Adjust Your Thermostat

- When you are home and awake, set your thermostat at the lowest comfortable temperature.
- When you are asleep or out of the house, turn your thermostat down about 12 degrees for eight hours and save around 10% a year on your heating bills.
- You can set programmable thermostats to keep the temperature where you want day and night.

Air Leaks and Insulation

- Seal the air leaks on the inside and outside walls of your home. These can be holes for pipes and wires, gaps around chimneys, or unfinished spaces behind cupboards and closets.
- Add caulk or weatherstripping to seal air leaks around leaky doors and windows.
- Check your attics insulation. Depending on what climate you live in there are different insulating products and thickness that work best for your area.

Maintain Your Heating Systems

- Schedule service for your heating system.
- Do regular maintenance to keep your heating system operating efficiently.
- Furnace - Replace your furnace filter once a month or as needed.
- Fireplace - Clean the flue vent regularly and the inside of the appliance with a wire brush periodically to ensure that your home is heated efficiently.

Lower Your Water Heating Costs

- On average 18% of the energy consumed in your home is from the water heater. Turn down the temperature of your water heater to a setting around (120°F). This will save energy and can help prevent burns.

Lighting

- Use light emitting diodes "LED's". They use less energy and have a longer life span.

TORNADO SAFETY

Precautions:

- KNOW WHERE YOU CAN TAKE SHELTER IN SECONDS.
- HAVE A PLACE, EVERYONE KNOWS, TO GO TO AFTER THE STORM HAS PASSED.
- FLYING DEBRIS IS THE BIGGEST DANGER DURING A TORNADO. YOUR SHELTER SPACE SHOULD HAVE MATTRESSES OR THICK BLANKETS AROUND, TO PROTECT YOURSELVES.
- DO NOT OPEN YOUR WINDOWS TO TRY & "EQUALIZE THE PRESSURE." THIS ONLY MAKES IT EASIER FOR DEBRIS TO INJURE YOU.
- ALSO, STAY AWAY FROM WINDOWS!

Things to Look and Listen for:

- CONSTANT ROTATION OF THE CLOUDS BASE.
- FLYING/ROTATING DEBRIS UNDER THE CLOUD.
- TORNADOS DON'T ALWAYS HAVE A VISIBLE FUNNEL.
- HEAVY RAIN OR HAIL FOLLOWED BY EITHER BY AN EERIE CALM IN THE STORM OR RAPID WIND CHANGES & SHIFTS.
- LISTEN FOR LOUD, CONTINUOUS RUMBLING WITH NO BREAKS IN IT LIKE THUNDER.

Lightning Distance Tracker

YOU CAN FIGURE OUT HOW FAR AWAY THE LIGHTNING IS FROM YOU LIKE THIS...
COUNT THE SECONDS IN BETWEEN THE FLASH OF LIGHTNING & THE CRACK OF THUNDER.
DIVIDE THE NUMBER OF SECONDS BY 5 & YOU HAVE YOUR DISTANCE IN MILES.

0 SECONDS	5 SECONDS	20 SECONDS	60 SECONDS
0 MILES	1.08 MILES	4.35 MILES	13.06 MILES

Do Not Open Your Windows!

 with all other legal methods not using dogs
 Sept. 14-Oct. 4
 with aid of dogs
 with aid of bait
 with all other legal methods
 Oct. 5-11
 with aid of dogs only

SMALL GAME

Cottontail Rabbit
 Northern Zone | Sept. 17-Feb. 28, 2017
 Southern Zone | Oct. 15 (9 AM) - Feb. 28, 2017
 Squirrels (Gray and Fox) | Sept. 17-Jan. 31, 2017

PROTECTED SPECIES

Hunting protected species—such as badger, woodchuck, jackrabbit, moose and flying squirrel—is prohibited. See 2016 Small Game Regulations for more details

*Please contact your local DNR office for specific hunting and trapping zone regulations. For general information on firearm safety training call: 1 (888) 936-7463.

All hunters should consider taking an advanced hunter education class to learn the latest hunting techniques along with tips on coming home alive.

Here are 5 Suggestions for a safe and successful hunting experience:

1. Get a detailed map of the area you are hunting, review it before you leave, and carry it with you in the field.
2. Carry a compass and know how to use it. Decide ahead of time the direction to head for if you get lost or disoriented.
3. Weather can change quickly, so hunters should carry a simple survival kit and be prepared for an unexpected overnight stay in the field. The survival kit should contain a rope, a knife, water, waterproof matches, an emergency shelter, and first aid supplies.
4. If you are on the water, make sure to wear a personal flotation device (life preserver).
5. Know your hunting partners' physical and emotional limitations, as well as your own, and don't push your partners or yourself beyond those limits.

You can purchase hunting and fishing licenses, cross-country ski passes and snowmobile trail stickers through the Electronic License System.

Online: dnr.wi.gov, Toll Free: 1 (888) 936-7463 or visit one of the

Operating Watercraft

FOLLOW THESE GUIDELINES TO HELP PREVENT AND PREPARE FOR CAPSIZING, SWAMPING, OR SOMEONE FALLING OVERBOARD.

- MAKE SURE THAT YOU AND YOUR PASSENGERS ARE WEARING LIFE-JACKETS WHILE THE BOAT IS MOVING.
- ATTACH THE IGNITION SAFETY LANYARD TO YOUR WRIST, CLOTHES, OR LIFE JACKET.
- DON'T ALLOW ANYONE TO SIT ON THE GUN WALE, BOW, SEAT BACKS, MOTOR COVER, OR AREAS NOT DESIGNED FOR SEATING. ALSO, DON'T LET ANYONE SIT ON PEDESTAL SEATS WHEN CRAFT IS NOT IN IDLE.
- DON'T OVERLOAD YOUR BOAT. BALANCE THE LOAD OF PASSENGERS AND GEAR STORED ON-BOARD.
- KEEP YOUR CENTER OF GRAVITY LOW BY NOT ALLOWING PEOPLE TO STAND UP OR MOVE AROUND WHILE CRAFT IS IN MOTION.
- IN SMALL BOATS, DON'T ALLOW ANYONE TO LEAN BEYOND THE GUNWALE.
- TURN BOAT AT SLOW RATES OF SPEED.
- SECURE THE ANCHOR LINE TO THE BOW, NEVER TO THE STERN.
- DON'T RISK OPERATING WATER CRAFT IN ROUGH CONDITIONS OR BAD WEATHER.

Who May Operate a Motorboat

(OTHER THAN A PERSONAL WATERCRAFT)

- **FOR ENGINES 25 HORSEPOWER OR LESS:**
 - THOSE UNDER AGE 12 MAY OPERATE WITHOUT RESTRICTIONS.
- **FOR ENGINES OVER 25 HORSEPOWER THROUGH 75 HORSEPOWER:**
 - THOSE UNDER AGE 12 MUST HAVE SOMEONE 21 YEARS OF AGE OR OLDER ON BOARD WITHIN REACH OF THE CONTROLS.
- **FOR ENGINES OVER 75 HORSEPOWER:**
 - NO CHILDREN UNDER AGE 12 MAY OPERATE, EVEN WITH AN ADULT ON BOARD.
 - OTHER RESTRICTIONS APPLY TO BOAT OPERATORS 12 TO 17 YEARS OLD:
 - OPERATORS FROM 12 TO 17 YEARS OF AGE MAY OPERATE ENGINES OF 25 HORSEPOWER OR LOWER WITH NO RESTRICTIONS.
- **FOR ENGINES OVER 25 HORSEPOWER:**
 - OPERATORS 12 TO 17 YEARS OF AGE MUST HAVE: A WATERCRAFT OPERATOR'S PERMIT, OR SOMEONE AGE 21 YEARS OR OLDER OLD ON BOARD WITHIN REACH OF THE CONTROLS.

All Watercraft Must Have...

- AT LEAST ONE COAST GUARD APPROVED TYPE 1, 2, 3 OR 5 FLOTATION DEVICE THAT IS THE PROPER SIZE FOR EACH PERSON ON BOARD OR BEING TOWED.
- ALL DEVICES MUST BE IN GOOD CONDITION AND EASILY ACCESSIBLE.
- CHILDREN UNDER AGE 10 MUST WEAR A DEVICE WHEN ON BOARD A BOAT THAT IS UNDERWAY UNLESS:
 - IN AN ENCLOSED CABIN OR BELOW DECK OR ON AN ANCHORED BOAT THAT IS BEING USED FOR SWIMMING OR DIVING OR PASSENGER CRAFT WITH A LICENSED CAPTAIN.
- ALONG WITH THE ABOVE AT LEAST ONE APPROVED TYPE 4 MUST BE ON BOARD BOATS 16 FT. OR LONGER (EXCEPT CANOES AND KAYAKS) AND IMMEDIATELY AVAILABLE.
- A COAST GUARD APPROVED TYPE 5 DEVICE MAY BE SUBSTITUTED FOR ANY OTHER COAST GUARD APPROVED DEVICE IF IT MEETS THE SAME REQUIREMENTS AND IS NOTED ON THE LABEL.
- ANYONE RIDING A JET SKI OR OTHER PERSONAL WATER CRAFT MUST WEAR AN APPROVED -NON INFLATING FLOTATION DEVICE, AS WELL AS ANYONE BEING TOWED BY A WATER CRAFT.

Bicycle Hand Signals

Snowmobile Hand Signals

Communication is an essential part of safe riding. Hand signals are a practical way to communicate between other riders and traffic. Be sure to give easy to see and clear hand signals when snowmobiling. Hand signals should never be subtle, but always deliberate.

Right Turn 	Slowing
Stop 	Sleds Following
Left Turn 	Last Sled in Line
Oncoming Sleds 	

Read the owner's manual

and know your vehicle thoroughly.

- Check your vehicle before you ride.
- Wear protective equipment and clothing.
- Don't lend your vehicle to unskilled riders.
- Supervise young or inexperienced riders.
- Never carry a passenger on vehicles meant for one rider.
- Do not operate under the influence of drugs or alcohol.
- Drive at speeds that are appropriate to trail conditions.
- Stay to the right on trails.
- Stay away from thin ice, open water and wetlands.
- Know the weather forecast.
- Make sure headlights and taillights work properly.
- Maintain safe distances between other riders.
- Reduce your speed when riding at night.
- Yield to other motor vehicles and trail users.
- Young or beginning riders are encouraged to take a safety training course.

Know Your ATV

Be Cautious of Other Bikers

- Always wear a properly fitting bike helmet as most serious injuries are to the head.
- Be sure your handlebars, seat and wheels fit snugly.
- Keep your bike in good shape by checking and oiling your chain, making sure your brakes work properly and maintaining your tire pressure.
- Always ride with both hands on the handlebars except when doing turn signals.
- When leaving a driveway, curb or alleyway always stop and check for traffic in both directions.
- Cross only at intersections.
- Use the crosswalk to walk your bike across busy intersections and follow the traffic signals.
- Never ride against traffic. Travel in the same direction as the cars.
- Whenever you can, use bike routes and avoid busy streets.
- Don't ride near parked cars as doors can open and cause accidents.
- Obey all traffic signs and traffic lights.
- When biking with friends, ride in a single file.
- Always pass other bikers or pedestrians on the left and say "On your left!" to make your presence known.
- Always use bicycle hand signals to alert traffic of your changing direction.

Drink lots of Water!

SNOWMOBILE SAFETY

PRIVATE PROPERTY
NO TRESPASSING

Please respect private property and no trespassing signs. Stay on trails. Exercise extreme caution on all lakes and streams. Obey

all state and local laws and ordinances. Do not operate snowmobiles/ATV's on county roads or state highways.

- Do not consume alcohol or take drugs prior to or during your snowmobile trip. Doing so increases your chances of injury or death.
- Slow down and don't cut to the inside of the trail corners. It's dangerous and illegal.
- If you snowmobile at night, don't override your lights.
- Always use the buddy system. Never ride off alone.
- Drowning is one of the causes of many snowmobile fatalities. Whenever possible, avoid the ice.
- Wear sensible, protective clothing designed for operating a snowmobile.
- Use a full size helmet, goggles, or visor to prevent injuries from twigs, stones, ice chips and other debris.
- Avoid wearing long scarves. They may get caught in moving parts of the snowmobile.
- Know the terrain you are going to ride. If unfamiliar to you, ask someone who has traveled over it before.
- Know the weather forecast, especially the ice and snow conditions.
- Be sure your snowmobile is in top-notch mechanical condition throughout the months of use.
- Familiarize yourself with the snowmobile you are driving. Thoroughly read the manual that accompanies the snowmobile.
- Do not pursue domestic or wild animals. That is not the conduct of a sportsman. Report such violations to the nearest law enforcement officer.

Slow Down!

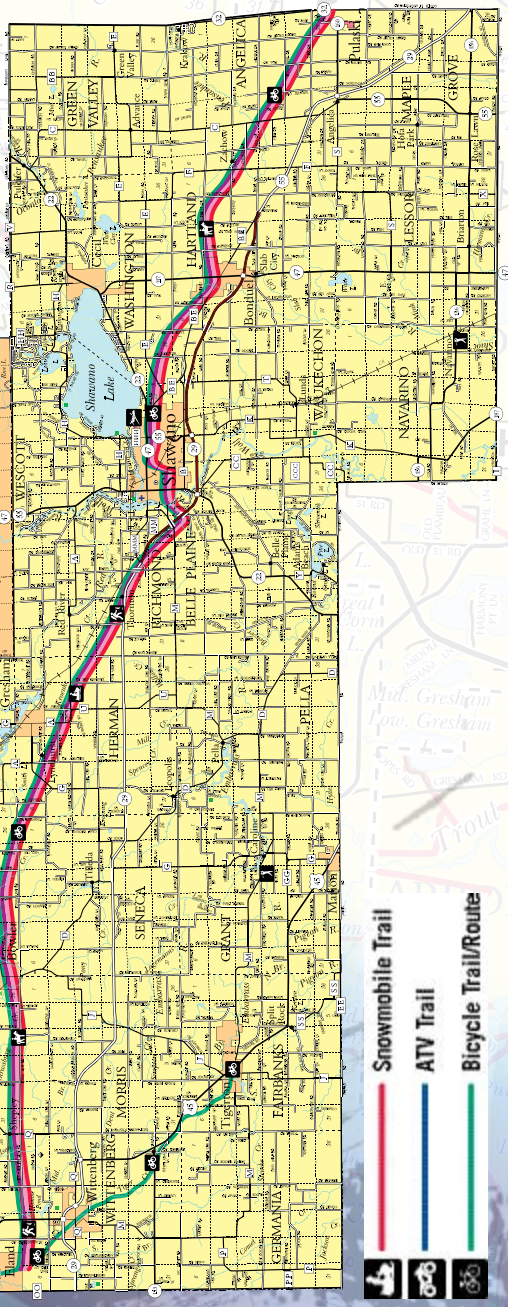

Snowmobiling is fun. Going to the hospital isn't.

10 Tips for Green Thumb GARDENING

Don't like all the dirt in your fingernails while you work in the garden? Before you go out, run your fingernails across a bar of soap and you'll effectively seal the undersides of your nails so dirt cannot accumulate. Then, after you are all done gardening, use a toothpick or nailbrush to remove the soap and your nails will be sparkling clean.

Spray vegetable oil on your string trimmer to help prevent jamming or breaking (Treat before installing string in trimmer).

Make a convenient measuring tool out of a long handled garden tool by laying it on the ground next to a tape measure. Use a permanent marker to copy the inches and feet. Next time you are spacing plants you already have a dual-purpose measuring tool in your hand!

Write the names of your plants (with a permanent marker) on the flat parts of stones of any size and lay them in front of your plants for natural looking markers.

The next time you boil or steam vegetables, use the leftover water to water potted patio plants, and you'll be surprised at how the plants grow with "vege-soup."

You can use leftover tea and coffee grounds to help acidify the soil of acid-loving plants like azaleas, rhododendrons, camellias, gardenias and blueberries. A light sprinkle of about 1/4 of an inch applied once a month will help keep the pH of the soil on the acidic side.

You can use chamomile tea to control damping-off fungus, which often attacks young seedlings quite suddenly. Just add some tea to the soil around the soil of seedlings once a week for healthy plant.

Here is a really quick way to dry out your herbs: Just lay a sheet of newspaper on the seat of your car, arrange the herbs in a single layer, then roll up the windows and shut the car doors. Your herbs will be dry in no time!

Use your blender to grind up egg shells. Just like a mother bird chews up worms for the baby birds making the food easier to digest, grinding eggshells makes it easy for your garden to absorb the calcium egg shells retain.

Animals (cats especially) seem to think all of the hard work you've put into your garden looks like a huge litter box. To keep them from pooping on your basil and other plants, strategically place a few plastic forks around your plants to deter them from destroying your fresh herbs, fruits, and vegetables.

PARENTS:

- Teach your kids that an emergency is when you need help from a doctor, a police officer or a firefighter.
- Designate a safe place by your house that a child can go to if they need help right away.
- Have your kids memorize your address and phone numbers. They should also know your full name and where you work.

KIDS:

FIRE SAFETY

- If you or someone else is on fire - remember to STOP, DROP and ROLL. Wrap a blanket on the person to help put out the fire.
- If there is a fire, leave the house as fast as you can! Crawl on the floor to avoid smoke and if the door is hot, don't open it - find another way out.
- Learn all the fire exits in your house. Assign a safe place outside for everyone to meet in case of a fire emergency.

HOME ALONE

- Never tell anyone that you are home alone.
- If someone calls and asks for your mom and dad, tell them "They cannot come to the phone right now, can you please call back later?"
- Do not answer the door, unless it is someone that you know your parents have okay'd them to come over.

FIRST AID FOR INSECT BITES/ANAPHYLAXIS & POISON SAFETY

INSECT BITES/ANAPHYLAXIS

Anaphylaxis is a severe allergic reaction from insect bites (latex, food and drug allergies can also cause Anaphylaxis). Typical symptoms include hives, the swelling of lips or eyes, swollen throat, drop in blood pressure, light headedness, confusion, nausea or diarrhea. If someone is having an allergic reaction from an insect bite seek medical attention immediately.

POISON PREVENTION

Teach your children about poison and how it can look like a food or drink. They should always ask an adult before eating or drinking anything. Have them learn the poison control phone number: 1-800-222-1222 and keep it programmed or posted near all your phones. Here are some prevention tips.

Lock up your poisons and medications. Keep them out of the reach of children, lock them up if possible. Make sure your children understand that medicine is not candy.

Follow directions carefully. Read your labels. Be sure to use and store all poisons and medications properly according to recommendations.

Keep your pets safe from household chemicals, too. Don't allow pets near areas that have just been cleaned with chemicals, such as freshly mopped floors or bleached bathtubs and sinks. Clean up any anti-freeze/coolant spills. Pets like the flavor but they can die if they ingest it. Store poisonous foods or plants in areas that your pets cannot access. Call your local emergency veterinary hospital if you believe your pet has been poisoned.

FIRST AID FOR BURNS & CHOKING

BURNS

For minor 1st and 2nd degree burns smaller than 3" in diameter: Cool the Burn. Run cool water over the burned area for 5 minutes, or until the pain diminishes. Never put ice on a burn!

Bandage the burn with sterile gauze:

It is important to use loosely wrapped gauze. This will avoid pressure and the bandage protects blisters. NEVER put lotions, vaseline, ointments or butter on burn. Do not break any blisters, which can cause infection.

Take Aspirin, Ibuprofen, Naproxen or Acetaminophen to relieve pain:

Minor burns usually heal with these basic treatments. Be aware for signs of infection which may include: increased pain, redness, fever, swelling or oozing. If symptoms develop, seek medical help. Avoid tanning the burned area for at least a year. Protect the area with sun-screen outdoors. Avoid giving aspirin to children.

For 3rd degree burns/all major burns - DIAL 911

DO NOT run cold water over large severe burns - this can cause shock.

DO NOT remove burnt clothing.

Check for signs of breathing/coughing/movement.

If there are no signs of breathing begin CPR.

Elevate burned areas above heart level, if possible.

Cover the burn(s) with cool, sterile, moist bandages, towels or cloth.

CHOKING

Most people clutch at their throats when choking, an obvious symbol for help. However, if a person isn't giving that signal, be alert for these indications. Inability to talk, difficulty breathing or noisy breathing, inability to cough forcefully, skin/lips/nails turning blue, loss of consciousness.

The Red Cross recommends a "five-and-five" method for first aid: First give five blows between the person's shoulders with the heel of your hand. Second, perform the Heimlich maneuver (abdominal thrusts) five times. Alternate between five back blows and five abdominal thrusts until the blockage is dislodged.

IN AN EMERGENCY, DIAL 911
