Have Fun and Be A Safe and Courteous Rider

Polaris supports Polk County Snowmobile Trails and Clubs

Polaris recommends that all riders take a safety course. All riders under 18 should be closely supervised. Obey local, state and provincial regulations and ride only in approved areas. Do not attempt maneuvers beyond your capability. Always wear a helmet and other safety apparel. Avoid excessive speeds. Be particularly careful on difficult terrain. Riding and alcohol or drugs don't mix. Please stay on the trails. Riding is a privilege.

For riding and safety informations, see your Polaris dealer or call the Polaris Safety Line at 1-800-342-3764

Polk County History (Balsam Lake, County Seat)

The first white explorers to venture to the St. Croix River area came in 1680. They were Daniel Graysolon and Sieur du Lhut, along with their fellow French-Canadian companions. Settlers to the area came as early as 1837, but it wasn't until 1838 that the St. Croix Falls settlement began. Many early settlers were Scandinavian and selected Polk County because it resembled their native homeland. Polk County was established in 1853 and it was formed from what had previously been St. Croix County. As the railroad arrived in 1883, Polk County began to grow and communities formed near rivers and rail stations. Polk County was named after the eleventh U.S. President, James K. Polk. Today Polk County is home to approximately 41,319 residents.

Polk County Communities

AMERY

Settlers were drawn to the Amery area because of its ample forest and proximity to the nearby river. A sawmill was constructed and a community began to grow around it. A dam was built to supply the sawmill and the community was first known as Big Dam. As the railroad arrived in 1887, more settlers began to arrive and establish businesses including a hotel, general stores, saloons, a bank and a brickyard. The community was then renamed Amery to honor William Amery, a prominent local resident. Today Amery is home to approximately 2,845 residents.

BALSAM LAKE (COUNTY SEAT)

Originally home to Chippewa Indians, Balsam Lake was settled in the 1850s. The name Balsam Lake comes from the word Innenehinduc, which translates to Place of Evergreen. The town of Balsam Lake was organized in 1870 and early businesses included a blacksmith shop, general stores, creameries, sawmills, hardware store, bank and a town hall. Today Balsam Lake is the county seat of Polk County and is home to approximately 950 residents.

LUCK

The first settler to the area was William Foster, who arrived in 1857. In 1869, Danish immigrants organized a township. The railroad arrived in 1901 and the community began to grow. The first cooperative creamery in the United States was built here and early industry included dairy farming and agriculture. Once known as Lawson City, Luck became incorporated as a village in 1905. Today Luck is home to approximately 1,210 residents.

OSCEOLA

In 1844, settlers from Maine, including William Kent, came to the area and built a sawmill. The area was named Leroy, after the first white man who died there, and Bluffville, after nearby sandstone cliffs. By 1855, William Kent owned the entire claim. In 1858, the name of the two settlements was changed to Osceola, named by James Livingston in honor of the great Seminole Indian Chief of Florida. Once a popular steamboat stop, Osceola began to thrive as the railroad arrived in the late 1880s. Today Osceola is home to approximately 2,421 residents.

ST. CROIX FALLS

Settlers arrived to the St. Croix Falls area in 1838 and early industry included logging. Sawmills were built near the falls and soon grist mills, specialty shops, general stores and flour mills were thriving. A hydropower plant was built in the early 1900s to harness the power of the falls and the community continued to grow. Today St. Croix Falls is home to approximately 2,033 residents.

8 Polk & St. Croix Counties | Resident Guide

St. Croix County History (Hudson, County Seat)

In 1840, the first settlement in the area was located at the mouth of the Willow River. The land was settled by Louis Massey and Peter Bouchea. The legislature of Wisconsin created the county of St. Croix that same year and named it after the St. Croix River. By 1849, resident Moses Perrin opened a boarding house in what is now the city of Hudson. The United States Land Office was established in Hudson in 1849, which helped increase the population and the community was selected as the county seat. The primary industry for the area was farming and in 1881, wheat had become the main crop. Today St. Croix County is home to approximately 63,155 residents.

St. Croix County Communities

BALDWIN

Founded by Dana Reed Bailey, Baldwin was originally known as Clarkesville. Flour mills and sawmills were built near the river and in 1871 the railroad arrived. The community was renamed Baldwin after the West Wisconsin Railroad president, D.A. Baldwin. Today Baldwin is home to approximately 2,667 residents.

GLENWOOD CITY

Settled in 1880, Glenwood City was named after the nearby ample forests. As the railroad arrived in 1885, Glenwood City began to grow and lumber mills were established. By 1890, Glenwood City was the major trading center of the St. Croix River Valley. As timber resources were exhausted, agriculture dominated industry. Today Glenwood City is home to approximately 1,183 residents.

HAMMOND

Settled in 1855, Hammond was named in honor of early developer R.B. Hammond. The community was platted in 1857 and the area began to grow. With the advent of the railroad, more settlers arrived to Hammond and businesses were established. Today Hammond is home to approximately 1,113 residents.

HUDSON (COUNTY SEAT)

In 1840, Hudson was founded by Louis Massey and Peter Bouchea. They set up a community near the mouth of the Willow River, of which it was also named. In 1848, the name was changed to Buena Vista - a name that better suited the area's beautiful views. People were drawn to the area for its lumber industry which was at the time the foremost industry. In 1852 the first mayor, A.D. Gray, petitioned to change the city's name to Hudson, as many travelers noticed the resemblance of the St. Croix River to the Hudson River in New York. The railroad came to Hudson in 1871 and helped increase the population dramatically. Today Hudson is the county seat of St. Croix County and is home to approximately 8,775 residents.

KINNICKINNIC

Founded in the mid 1800s, settlers were attracted to the rivers, streams and pastures of the Kinnickinnic area. The community is named after the Indian word Kinnickinnic, meaning what is mixed as a tobacco substitute. As the railroad was built, Kinnickinnic began to grow. Today Kinnickinnic is home to approximately 1,400 residents.

St. Croix County Communities

NEW RICHMOND

New Richmond was founded in 1857 and was named after Richmond Day who surveyed the community. By 1880 many businesses had been established and in 1899 a deadly tornado almost destroyed the town, wiping out entire blocks. Within five months, most of the community was rebuilt. Today New Richmond is home to approximately 6,310 residents.

SOMERSET

Joseph and Louis Parent, who were French-Canadian explorers, came to the St. Croix area in 1850 looking to homestead. They established their settlement on the bluffs above the mouth of the Apple River. Since potatoes grew well here, the spot was named La Pointe de la Pomme de Terre, which translates to point of the apples of the earth. Settlers Samuel and Hud Harriman arrived at the Apple River in 1856. They founded a mill, store and logging empire. Since the area closest to the St. Croix was already settled, they settled north where they built a dam for a mill. They platted a village and named it Somerset in honor of their father's birthplace, Somerset County, England. In 1856, the community became established as a township. Today Somerset is home to approximately 1,556 residents.

WOODVILLE

Named for the dense woods occupying the area, Woodville was first settled in 1870 by J. M. S. Anderson. Anderson built the first sawmill and the railroad arrived soon after in 1872. Anderson was also the community's first postmaster, establishing a post office in 1875. By 1907, a restaurant, butcher and specialty shops were built and incorporation followed in 1911. Today Woodville is home to approximately 1,104 residents.

Hunting Safety

All hunters should consider taking an advanced hunter education class to learn the latest hunting techniques along with tips on coming home alive.

Here are five suggestions for a safe and successful hunting experience:

1. Get a detailed map of the area you are hunting, review it before you leave, and carry it with you in the field.

- **2.** Carry a compass and know how to use it. Decide ahead of time the direction to head for if you get lost or disoriented.
- **3.** Weather can change quickly in Minnesota, so hunters should carry a simple survival kit and be prepared for an unexpected overnight stay in the field. The survival kit should contain a rope, a knife, water, waterproof matches, an emergency shelter, and first aid supplies.
- **4.** If you are on the water, make sure to wear a personal flotation device (life preserver).
- **5.** Know your hunting partners' physical and emotional limitations, as well as your own, and don't push your partners or yourself beyond those limits.

Wisconsin State Record Fish

Follow these steps if you catch a fish that you think could be a record:

- Weigh the fish on a state-certified scale (found at most bait shops and butcher shops), witnessed by two observers.
- Take the fish to a DNR fisheries office for positive identification and a state record fish application.
- Complete the state record submission form and send it along with a clear, full-length photo of your fish to the address listed on the form.

Boating Safety

Operating Watercraft

Follow these guidelines to help prevent and prepare for capsizing, swamping, or someone falling overboard.

- Make sure that you and your passengers are wearing life jackets while the boat is moving.
- Attach the ignition safety lanyard to your wrist, clothes, or life jacket.
- Don't allow anyone to sit on the gunwale, bow, seat backs, motor cover, or areas not designed for seating. Also, don't let anyone sit on pedestal seats when craft is not in idle.
- Don't overload your boat. Balance the load of passengers and gear stored on-board.
- Keep your center of gravity low by not allowing people to stand up or move around while craft is in motion.
- In small boats, don't allow anyone to lean beyond the gunwale. Turn boat at slow rates of speed. Secure the anchor line to the bow, never to the stern. Don't risk operating water craft in rough conditions or bad weather.

Monday - Friday: 4am -10pm • Saturday & Sunday: 6am-10pm

Boating Safety

Know Your Craft

BEAM: MAXIMUM WIDTH OF BOAT

KEEL: CENTERLINE OF BOAT OR EXTENSION OF HULL (INCREASES STABILITY)

Who May Operate a Motorboat (Other Than a Personal Watercraft)

For engines 25 horsepower or less:

Those under age 12 may operate without restrictions. For engines over 25 horsepower through 75 horsepower:

Those under age 12 must have someone 21 years of age or older on board within reach of the controls.

For engines over 75 horsepower:

No children under age 12 may operate, even with an adult on board.

Other restrictions apply to boat operators 12 to 17 years old:

Operators from 12 to 17 years of age may operate engines of 25 horsepower or lower with no restrictions.

For engines over 25 horsepower:

Operators 12 to 17 years of age must have: A watercraft operator's permit, or someone age 21 years or older old on board within reach of the controls.

250 West Richmond Way • New Richmond, WI 715-246-5509

ATV Safety

- Read the owner's manual and know your vehicle thoroughly.
- Check your vehicle before you ride.
- Wear protective equipment and clothing.
- Don't lend your vehicle to unskilled riders.
- Supervise young or inexperienced riders.
- Never carry a passenger on vehicles meant for one rider.
- Do not operate under the influence of drugs or alcohol.
- Drive at speeds that are appropriate to trail conditions.
- Stay to the right on trails.
- Stay away from thin ice, open water and wetlands
- Know the weather forecast.
- Make sure headlights and taillights work properly.
- Maintain safe distances between other riders.
- Reduce your speed when riding at night.
- Yield to other motor vehicles and trail users.

• Young or beginning riders are encouraged to take a safety training course.

POLK COUNTY

Bicycle Safety

- Always wear a properly fitting bike helmet as most serious injuries are to the head.
- Be sure your handlebars, seat and wheels fit snugly.
- Keep your bike in good shape by checking and oiling your chain, making sure your brakes work properly and maintaining your tire pressure.
- Always ride with both hands on the handlebars except when doing turn signals.
- When leaving a driveway, curb or alleyway always stop and check for traffic in both directions.
- Cross only at intersections.
- Use the crosswalk to walk your bike across busy intersections and follow the traffic signals.
- Never ride against traffic. Travel in the same direction as the cars.
- Whenever you can, use bike routes and avoid busy streets.
- Don't ride near parked cars as doors can open and cause accidents.
- Obey all traffic signs and traffic lights.
- When biking with friends, ride in a single file.
- Always pass other bikers or pedestrians on the left and say "On your left!" to make your presence known.
- Always use bicycle hand signals to alert traffic of your changing direction.

Snowmobile Safety

- Do not consume alcohol or take drugs prior to or during your snowmobile trip. Doing so increases your chances of injury or death.
- Slow down and don't cut to the inside of the trail corners. It's dangerous and illegal.
- If you snowmobile at night, don't override your lights.
- Always use the buddy system. Never ride off alone.
- Drowning is one of the causes of many snowmobile fatalities. Whenever possible, avoid the ice.
- Wear sensible, protective clothing designed for operating a snowmobile.
- Use a full size helmet, goggles, or visor to prevent injuries from twigs, stones, ice chips and other debris.
- Avoid wearing long scarves. They may get caught in moving parts of the snowmobile.
- Know the terrain you are going to ride. If unfamiliar to you, ask someone who has traveled over it before.
- Know the weather forecast, especially the ice and snow conditions.
- Be sure your snowmobile is in top-notch mechanical condition throughout the months of use.
- Familiarize yourself with the snowmobile you are driving. Thoroughly read the manual that accompanies the snowmobile.
- Do not pursue domestic or wild animals. That is not the conduct of a sportsman. Report such violations to the nearest law enforcement officer.

Snowmobile Safety

Communication is an essential part of safe riding. Hand signals are a practical way to communicate between other riders and traffic.

Be sure to give easy to see and clear hand signals when snowmobiling. Hand signals should never be subtle, but always deliberate.

Emergency Planning

ESCAPE ROUTES

Everyone in your family should know the best ways to exit the house in case of a disaster. Teach your young children how to open sliding doors, windows and other exits. Designate a meeting place where the family can gather after escaping from the house.

FLASHLIGHTS

The whole family needs to know where to find flashlights. Periodically check the batteries.

FULLY CHARGED CELL PHONES

All family members should keep their cell phones charged. Make a habit of charging them, while everyone is asleep. Cell phones can be lifesavers in emergencies.

LIST OF VALUABLES

Keep this document listing your possessions (and if possible, a video of your home interior) in a fireproof safe, or in a safe deposit box at a bank.

COMMUNITY EMERGENCY PLANS

Familiarize yourself with community evacuation plans and neighborhood escape routes. Post a copy of them in a highly visible place in your home.

THUNDERSTORM/TORNADO

- Remove dead branches from trees beforehand to avoid injury or damage.
- After seeing lightning, if you hear thunder in less than 30 seconds, it is recommended that you stay inside for 30 minutes after the thunder has ceased.
- The inside of a car is safer than the outside, as a lightning strike will simply pass through the car as long as you aren't in contact with any metal.
- Unplug all major appliances, as a power surge can cause serious damage.
- Avoid all tall structures and elevated areas as well as large amounts of metal.

FIRES

- Make sure that every level of your house has a smoke detector, and be sure to test them once a month. Have the family plan an emergency exit route.
- Always keep track of any stoves or high-temperature/ high-voltage appliances that are running. Be sure to never leave any cooking unattended.
- Keep lighters and matches away from children.
- If a burn occurs, soak the skin in cool water. If the skin blisters, seek medical assistance.

Carbon Monoxide Safety

PREVENTION

- Install carbon monoxide detectors near every bedroom, gas appliance and in your RV, camper or motor home and test them monthly.
- Have flues, chimneys and all fuel-burning appliances inspected by a professional annually.
- Make sure fireplaces, wood stoves, dryers, furnaces and water heaters are properly vented to the outside.
- Only burn clean and untreated wood.
- Never idle your car or gas powered vehicle in the garage, with or without the garage door open.
- Toxic fumes build up quickly and can easily contaminate your home.
- Never use gas-powered engines like weed trimmers, snow blowers, chain saws, lawnmowers or portable generators in enclosed areas.
- Never use a charcoal grill indoors or in any closed area.
- Never use a gas oven to heat your home.
- Never sleep in a room or area heated with a gas or kerosene space heater that does not have proper ventilation.

SYMPTOMS

- Headaches, severe fatigue, vomiting, nausea, muscle and joint pain, dizziness, tingling, vertigo
- Attention and multi-tasking problems, short-term memory problems, word-finding problems
- Irritability, temper, loss of interest, sleep disturbance, anxiety, lack of motivation
- Eating and swallowing difficulties, vision problems, lack of muscular coordination, speaking difficulty, ringing in the ears
- Seizures, tremors, balancing problems, shortness of breath

Carbon monoxide poisoning is easily confused with flu-like symptoms. Serious longterm health risks or death can result if warning signs are ignored. Carbon monoxide can affect you for days, weeks, months or years. High levels of carbon monoxide can be fatal within minutes.

TREATMENT

- Immediately take the victim out to fresh air.
- If the victim cannot be removed, open every window and door.
- All appliances should be turned off.
- Take the victim to an emergency room as quickly as fast as possible, or call 911.

• Emergency First-Aid Tips

FIRST AID FOR CPR & HEART ATTACK

CPR

CPR is to be administered when a person is not breathing or has no pulse. Be quick to act by remembering the A,B,C's: Airway, Breathing & Circulation.

Airway:

Place the person on a firm surface, on their back. Kneel next to the person's neck and shoulders. Open the person's airway by tilting back the head and lifting the chin.

Breathing:

With the head tilted and chin lifted, pinch the nostrils shut and cover the person's mouth with yours. Give two slow breaths.

Circulation:

Find the hand position on the center of the breastbone. Place the heel of your hand on that position, with your other hand on top of the first hand. Use your upper body weight to push down. Give two compressions per second. Compress the chest at a rate equal to 100/minute. Perform 30 compressions at this rate. Repeat until an ambulance arrives.

HEART ATTACK

Symptoms of a heart attack may include any of the following:

- Uncomfortable pressure, fullness or squeezing pain in the center of the chest.
- Expanded pain in the upper abdomen.
- Shortness of breath.
- Pain or numbness in either arms, shoulders, neck, jaw or teeth.
- Dizziness or fainting.
- Nausea and sweating.

If you or someone else may be having a heart attack - follow these steps immediately: • DIAL 911

- Chew and swallow Aspirin (unless you are allergic/not allowed to)
- Take Nitroglycerin (only if prescribed)
- Begin CPR if the person is unconscious

IN AN EMERGENCY, DIAL 911

• Emergency First-Aid Tips •

FIRST AID FOR BURNS & CHOKING

BURNS

For minor 1st and 2nd degree burns smaller than 3" in diameter: Cool the Burn. Run cool water over the burned area for 5 minutes, or until the pain diminishes. Never put ice on a burn!

Bandage the burn with sterile gauze:

It is important to use loosely wrapped gauze. This will avoid pressure and the bandage protects blisters. NEVER put lotions, vaseline, ointments or butter on burn. Do not break any blisters, which can cause infection.

Take Aspirin, Ibuprofen, Naproxen or Acetominophen to relieve pain:

Minor burns usually heal with these basic treatments. Be aware for signs of infection which may include: increased pain, redness, fever, swelling or oozing. If symptoms develop, seek medical help. Avoid tanning the burned area for at least a year. Protect the area with sunscreen outdoors. Avoid giving aspirin to children.

For 3rd degree burns/all major burns - DIAL 911 DO NOT run cold water over large severe burns - this can cause shock. DO NOT remove burnt clothing. Check for signs of breathing/coughing/movement. If there are no signs of breathing begin CPR. Elevate burned areas above heart level, if possible. Cover the burn(s) with cool, sterile, moist bandages, towels or cloth.

CHOKING

Most people clutch at their throats when choking, an obvious symbol for help. However, if a person isn't giving that signal, be alert for these indications. Inability to talk, difficulty breathing or noisy breathing, inability to cough forcefully, skin/lips/nails turning blue, loss of consciousness.

The Red Cross recommends a "five-and-five" method for first aid: First give five blows between the person's shoulders with the heel of your hand. Second, perform the Heimlich maneuver (abdominal thrusts) five times. Alternate between five back blows and five abdominal thrusts until the blockage is dislodged.

IN AN EMERGENCY, DIAL 911

• Emergency First-Aid Tips

FIRST AID FOR INSECT BITES/ANAPHYLAXIS & POISON SAFETY INSECT BITES/ANAPHYLAXIS

Anaphylaxis is a severe allergic reaction from insect bites (latex, food and drug allergies can also cause Anaphylaxis). Typical symptoms include hives, the swelling of lips or eyes, swollen throat, drop in blood pressure, light headedness, confusion, nausea or diarrhea. If someone is having an allergic reaction from an insect bite with these symptoms:

CALL 911.

Administer emergency prescription medication. See if the person is carrying special emergency allergy medicine and give it to them according to the directions.

Loosen tight clothing.

Lay the person down. The person should lay down on their back with feet elevated. Turn them on their side if they are vomiting or bleeding from their mouth to prevent them from choking. If they are not breathing - administer CPR. Most insect bite reactions are mild and cause no allergic reaction. If stung by a bee, use a straight edged object, like a credit card, to scrape away the stinger. Don't use tweezers - they can pinch more venom out of the stinger. Apply an ice pack to the area and take an over the counter pain reliever.

POISON PREVENTION

Teach your children about poison and how it can look like a food or drink. They should always ask an adult before eating or drinking anything. Have them learn the poison control phone number: 1-800-222-1222 and keep it programmed or posted near all your phones. Here are some prevention tips.

Lock up your poisons and medications. Keep them out of the reach of children, lock them up if possible. Make sure your children understand that medicine is not candy.

Follow directions carefully. Read your labels. Be sure to use and store all poisons and medications properly according to recommendations.

Keep your pets safe from household chemicals, too. Don't allow pets near areas that have just been cleaned with chemicals, such as freshly mopped floors or bleached bathtubs and sinks. Clean up any antifreeze/coolant spills. Pets like the flavor but they can die if they ingest it. Store poisonous foods or plants in areas that your pets cannot access. Call your local emergency veterinary hospital if you believe your pet has been poisoned.

IN AN EMERGENCY, DIAL 911

Safety Tips for Parents & For Kids

PARENTS:

- Teach your kids that an emergency is when you need help from a doctor, a police officer or a firefighter.
- Designate a safe place by your house that a child can go to if they need help right away.
- Have your kids memorize your address and phone numbers. They should also know your full name and where you work.

KIDS: FIRE SAFETY

- If you or someone else is on fire remember to STOP, DROP and ROLL. Wrap a blanket on the person to help put out the fire.
- If there is a fire, leave the house as fast as you can! Crawl on the floor to avoid smoke and if the door is hot, don't open it find another way out.
- Learn all the fire exits in your house. Assign a safe place outside for everyone to meet in case of a fire emergency.

HOME ALONE

- Never tell anyone that you are home alone.
- If someone calls and ask for your mom and dad, tell them "They cannot come to the phone right now, can you please call back later?"
- Do not answer the door, unless it is someone that you know your parents have okay'd them to come over.
